

Bruno Justa

DIGITAL PRODUCT MANAGER & AI LEAD

I solve problems, and I don't let go until there is a solution. I started in web development, moved into design through a master's degree, and with AI the two finally line up: I take an idea from the interface to a running product, speak to the business and to the developers, and put method where there was none. What I like most is looking at a finished product and being proud of it.

EXPERIENCE

Digital Experience Specialist & AI Lead

Sep 2024 – Present

Sogrape Vinhos S.A.

I lead the design, product management, and AI development of Sogrape's internal products, turning business needs into solutions from concept to production.

- Design intuitive, user-centered experiences across Sogrape's digital ecosystem.
- Built and launched Sogrape's first internal AI agent, answering employees' day-to-day, HR and corporate questions across the company. It cut the time employees spend searching for internal information by 30% and runs at over 500 sessions a month, at 65% engagement, with 92.3% of generated answers rated good quality.
- AI Lead on internal applications built with Google AI Studio, from requirements through to the production deploy. Delivered a generative AI hub for marketing image used by more than 10 brands, with 572 media assets created and 366 hours saved before go-live; automatic scheduling for wine tourism; a scraper that compares product prices across retailer stores; and an application supporting recorking services.
- Wrote the method the company now uses to build these applications. With AI the coding stopped being the bottleneck, so the effort moved to defining what to build and checking what came out. Documented well for anyone to pick it up.
- Product Manager end to end on a mobile and web compliance application for more than 500 agricultural subcontractors, launched for Harvest 2024. Document validation time down 60%, first-time compliance up 40%, and recognised as a success case by five internal areas.

UX / Product Designer

Jan 2023 – Sep 2024

Sogrape Vinhos S.A.

Designed user-centred interfaces across Sogrape's platforms for internal and external audiences. Worked with cross-functional teams to refine visual hierarchy and interaction flows into coherent digital products.

UX/UI Designer

Jul 2021 – Dec 2022

Willbe Collective

Worked across client projects in the design department, from e-commerce to institutional sites, covering both the interface and the front-end behind it. Dealt directly with clients, from the first meetings through to launch.

Earlier

Front-end Developer & UI Designer, internship at Willbe Collective (Mar – Jun 2021).
Digital Design, summer internship at Grupo Impetus (Jun – Aug 2019).

PRODUCT & AI

Product management, product strategy, roadmap and prioritisation, stakeholder management, AI agent design, prompt engineering, AI-assisted development, delivery methodology, requirements definition, environment and release management.

DESIGN

Product design, UX/UI design, user research, usability testing, user-centred design, design thinking, interaction design, prototyping, agile methodologies.

TOOLS

Google AI Studio	Copilot Studio		
Claude	GCP	Firebase	Figma
OutSystems	Power BI	HTML5	
CSS3	JavaScript		

EDUCATION

Product & UX Design Leadership

EDIT. Disruptive Digital Education
2024

MA Digital Design

Polytechnic Institute of Cávado and Ave
2021 – 2023

BSc Technologies and Information Systems for the Web

Polytechnic Institute of Porto
Object-oriented programming, web development, web design
2018 – 2021

OUTSIDE WORK

I take photographs, draw, go to the cinema more than I should, and read. New tools usually get tested at home first, on small apps I build for myself.
